SUMMARY OF INPUT FROM STATE REHABILITATION COUNCIL FOR FFY 2009

Agency central office staff, including the Administrator, attends SRC meetings that are held four times each year. Routine discussion items include:

- Major Events and Activities during past Quarter
- Progress on State and Strategic Plan
- Quarterly Performance on Standards and Indicators for the Agency
- Personnel Development Report
- Changes in Policies Under Consideration

Based upon the content and outcomes achieved of the above, a constructive dialog ensues with the SRC asking for points of clarification and providing advice and feedback to VR staff.

Regional Managers make presentations at each quarterly SRC meeting highlighting the Regional offices performance on standards and indicators, success stories, and challenges faced to providing quality services to clients.

Former VR clients, who have exited during the past twelve months, are invited and encouraged to meet with the SRC during their quarterly meetings and share their experiences while served by VR. On occasion, the interaction with the SRC results in remedial action to assist the client in pursuit of their vocational goal.

The Council completed a Consumer Satisfaction Survey this past fiscal year of past or present VR clients. The results were incorporated into the state-wide Needs Assessment and Development of the State Plan.

The Council attended the Agency annual in-service training and awards banquet. This provided the Council with the opportunity to discuss information with all of the staff of the Agency and to be aware of the work and successes of the Counselors through the "Rehabilitations of the Year" presentation.

The Agency provides the Council with updates on compliance with CSPD requirements and other Human Resource actions.

The Council is given the opportunity to provide guidance on issues. Examples include direct input in the clarification of the roles of a vocational rehabilitation assistant, the content of the agency's external public website, training protocol to be utilized for new vocational rehabilitation counselors and vocational assistants, and guidance in regard to defining categories under an order of selection. The agency accepted and incorporated all

suggestions of the SRC. In FFY 2009, the SRC developed a 3 year Strategic Plan in July. As a result two SRC Committees were charged with the responsibility of providing guidance to IDVR. Specifically, the Survey Committee gathered information including client satisfaction questionnaires and needs assessments in order to identify client needs to IDVR staff. The Council has a "Planning Committee" that works directly with Agency staff in the development of the Agency's State Plan. The Planning Committee participated in the development of the State Plan and will provide on-going monitoring of annual state plan progress.

Members of the Council were able to make direct contact with the legislature to advocate for the Agency's budget request.

The leadership of the Council attends CSAVR bi-annual Conferences to become aware of issues that face the Agency at the National level.

Members of the Agency management team give presentations to the Council in their area of Stewardship to help keep members of the Council up to date on issues and policies.

The Agency Administrator initiates and maintains contact with the SRC Chair to share ongoing issues.

Attachment 4.7(b)(3)

STATEWIDENESS AND WAIVER OF STATEWIDENESS

The Division provides services in one (1) or more political subdivisions of the State that increases services or expands the scope of services that are available statewide under this State Plan and:

- (1) The Division verifies in the specific Memoranda of Agreement (MOAs) that the contributions of these political subdivisions are certified as non-federal dollars attached for services, including funds contributed to a local agency by a private agency, organization or individual, and
- (2) The Division ensures that the services are likely to promote the vocational rehabilitation of substantially larger numbers of individuals with disabilities or of individuals with disabilities with particular types of impairments, and
- (3) The Division ensures that all services administered are in full agreement with the rules and regulations governing General Vocational Rehabilitation Programs as well as State Plan requirements and that the designated state unit (DSU) is in full agreement with the provision of those services.
- (4) The Division obtains written assurance that designated state unit approval will be obtained for each proposed service utilizing agency funds prior to service delivery.

Offender Population:

The Division continues to note an increase in the number of Corrections clients being referred to the Division for services. There are two identified areas in the state where correctional facilities are housed that require additional VR staff and resources to ensure that adequate vocational services are provided to the corrections population. This staff works solely with the Corrections population. To meet this need, an MOA with the Idaho Department of Correction (IDOC) was developed to provide comprehensive vocational rehabilitation services to felony clients/offenders both in an IDOC institution and in the community to prepare these individuals for reentry into the community by providing IDVR services.

The "Re-entry" MOA covers Correctional institutions in the Boise and Pocatello areas only. This agreement is designed as a cooperative effort to provide comprehensive vocational rehabilitation services to felony clients/offenders both in an IDOC institution and within the community. The IDOC pays a lump sum of \$63,654 certifiable non-federal monies toward the case service costs encumbered in both areas.

The District III Probation and Parole MOA provides funding to work with both male and female offenders who are being supervised by District III Probation and Parole and are residents at the Nampa Community Work Center (CWC) located in the Treasure Valley area. The IDOC pays a lump sum of \$45,000 certifiable non-federal monies toward the case service costs encumbered.

The prison system of Idaho concentrates most of its offenders in the four institutions in the Treasure Valley requiring a focused approach from IDVR in the southwest region of the state. Dedicated counselors partially paid by the Idaho Department of Correction are located within offices housing probation and parole officers. These six counselors also have offices or significant office hours located within the prison facilities for needed access to offenders prior to their release. The arrangement facilitates both quality and productivity on the part of IDVR counselors. An ongoing supportive partnership is reinforced from the co-location of staff and strengthened by the financial buy in from IDOC.

In both the northern and eastern part of the state, there are fewer residential facilities for imprisoned offenders. In the case of the northern part of the state, two facilities are located there and most offenders, if released from one of the facilities, are likely to relocate in the Treasure Valley. Consequently our counselors in the Treasure Valley tend to pick up clients from these facilities located in other parts of the state. On those occasions when offenders are released and remain in the northern or the eastern portion of the state, referrals are generally made to IDVR from Correction's personnel and these offenders begin an open case with the local counselors. This means all the typical services provided to the general population are also provided to the corrections clients in the offices outside of the Treasure Valley.

IDVR has entered into an agreement with Supportive Housing and Innovative Partnerships, Inc (SHIP) to provide housing assistance to VR eligible residents who have exited the correctional system and are residing in SHIP housing while they participate in a highly structured, time limited employment training and recovery program.

Supportive Housing and Innovative Partnerships, Inc's (SHIP) mission is to assist in rebuilding the lives of people in recovery from substance abuse by providing supportive housing, recovery services, employment training programs and green job opportunities to offenders who are reentering the community. The expectation is that relapse rates will be reduced by 45% through this structured process as compared to relapse rates for those not receiving treatment. The program includes the administration of twice weekly random drug tests for VR participants. SHIP will work with eligible residents to evaluate individual work skills, further develop work skill opportunities and training as well as

help with job search plans. IDVR will provide vocational guidance and counseling, housing assistance and random drug testing to eligible residents for a specified period of time while the individual participates in this program. Since the prison system of Idaho concentrates most of its offenders in the four institutions in the Treasure Valley, SHIP has acquired housing and services in this area to maximize the number of people who might participate in this residential training and recovery program.

Juvenile Offenders:

The Division in concert with the Idaho Department of Juvenile Corrections (IDJC) entered a Memorandum of Agreement (MOA) to provide comprehensive vocational services to juvenile offenders both in the IDJC institution and within the community. The goal of this MOA is to provide IDVR eligible clients/offenders located within the Treasure Valley area the opportunity to prepare for re-entry into the community by providing the full spectrum of IDVR services. IDJC will contribute \$42,173 of certifiable non-federal monies toward the case service costs encumbered.

Transitioning Student Population:

Due to the rural nature of Idaho and the increased travel time associated with serving the School/Work (transition) population, additional resources are necessary in certain areas of the state to ensure the needs are met. In collaboration with Special Education and IDEA, as well as federal initiatives, the Division has developed cooperative agreements with school districts in various areas throughout the state to provide comprehensive vocational rehabilitation services to students with disabilities to prepare these individuals for transition to work. A designated VR counselor and staff member are assigned to a consortium affiliated facility to better serve clients in the respective areas. The school districts will pay a total of \$191,090 in certifiable non-federal monies to IDVR to be used expressly for allowable costs incurred by IDVR in the implementation of the cooperative agreement. All parties have agreed to and signed the memoranda agreements. The memoranda agreements cover the following areas of the state:

- Region I Coeur d'Alene - Two Projects
- Region II Lewiston - One Project
- Region III Treasure Valley Special Programs - Five Projects
- Region IV Twin Falls - One Project
- Region V Pocatello - One Project
- Region VI Idaho Falls - One Project

It is worth contrasting the services in the regions of the state covered by the MOUs versus those not covered. The majority of the state high schools are covered by the transition agreements in the state. Those not covered by this approach tend to be smaller school districts or out of the way communities, although this is not always true. First of all, any

individual school district might participate in the arrangement. IDVR counselors are located or reside in high schools participating in the project. This provides an easy access to the transition age students eligible for IDVR services. The office space, phones and utilities are provided by the various schools where our counselors are located. These counselors carry a full caseload of transition students and are not dedicated to the general population eligible for IDVR services. The counselors keep the students on the caseload until they are closed by a successful rehabilitation or from failure to successfully complete the rehabilitation process. An important aspect of this agreement that is not feasible for a general counselor is the creation of a close working relationship with school personnel, more timely referrals, better support throughout the rehabilitation process, easy access to pertinent school staff, and the expertise that comes with specialization. The arrangement has proved important in developing an excellent working relationship between IDVR staff and school districts across the state.

In school districts not covered by the interagency agreements, students are referred by school counselors, special education teachers, or by word of mouth to IDVR. In such cases all of the normal and appropriate activities and services are provided by the DSU. In these regions of the state the counselor carries a general caseload with some transition age students. There is no service offered under the MOUs not also made available by the counselors providing services in the areas not covered by the MOUs. One difference however, must be mentioned. The counselors with full time caseloads of transition age youth typically become experts in providing services to this specialized caseload. At one time our agency believed this caseload would not be as productive as general caseload counselors, but the notion was proved wrong by several of the transition specialist counselors in recent years.

Mental Health Population:

Individuals with mental health issues have been historically underserved in Idaho. To ensure that the needs of this population are adequately met, the Division has developed an MOA with the Idaho Department of Health and Welfare, Division of Behavioral Health, Adult Mental Health to provide vocational rehabilitation services to Idahoans experiencing severe and persistent mental illness who are eligible for vocational rehabilitation services. A designated VR counselor and staff member are assigned to a consortium affiliated facility to better serve clients in the respective areas. The Department of Health and Welfare pays IDVR \$229,518 in certifiable non-federal monies for services executed under this Interagency Agreement. Both parties have agreed to and signed the memorandum. This Interagency Agreement covers the following areas only:

- Region I Coeur d'Alene
- Region II Lewiston
- Region III Boise/Caldwell/Nampa

Region IV Twin Falls
Region V Pocatello
Region VI Idaho Falls

Idaho continues to develop a system of mental health courts modeled after drug courts for those with persistent and severe mental illness (SPMI) disabilities. So far all of the mental health courts are located in geographic areas covered by our interagency agreements. The new system in conjunction with our counselor's efforts is proving useful in the rehabilitation process for consumers for whom success is most elusive.

In the regions of the state not covered by the interagency agreements SPMI consumers meet with general case load counselors and begin the normal rehabilitation process from application, to eligibility, plan development, service provision, placement, and eventual closure. In such cases the consumer is provided all the normal individualized services, however, is not able to access the counselors with the greatest expertise and specialization for MI. Additionally, the specialized counselors have developed a close working relationship with their respective regional mental health providers which encourages more timely referrals and better support through out the rehabilitation process.

Job Club and Job Development Services:

As a result of the significant downturn in the Idaho economy during the past year, the unemployment rate in metropolitan Boise now stands at 9.8%. As a result, caseload size has increased dramatically at the job ready status. In order to mitigate the backlog of employment ready individuals, the agency has entered into a one year contract with a professional job developer. Should the outcomes for this contract demonstrate a dramatic reduction in the backlog of employment ready individuals, IDVR will replicate this contract across the state if the economy remains stalled statewide.

4.8 COOPERATION, COLLABORATION, AND COORDINATION

IDVR does not engage in any programs carried out by the Under Secretary for Rural Development of the US Department of Agriculture.

Attachment 4.8(a)

COOPERATIVE AGREEMENTS WITH AGENCIES CARRYING OUT ACTIVITIES UNDER THE STATEWIDE WORKFORCE INVESTMENT SYSTEM

The Workforce Development Council is the sole workforce investment board in the state to oversee a statewide regional planning area. This requires the Council to exercise special responsibility for development and oversight of the state's workforce development infrastructure and program. As a result of this consolidation, there is a single memorandum of understanding (MOU) that includes all Workforce Investment System partners. The purpose of this MOU is to establish the framework for operation of the One Stop system in a manner that maximizes services to system customers while making efficient use of public resources.

The following statement from the agreement summarizes the intent and purpose of this statewide partnership:

"This Memorandum of Understanding (MOU) is entered into in the spirit of cooperation and collaboration by the Workforce Development Council, hereafter referred to as "the WDC" and the One Stop delivery system signatory partners, hereafter referred to as the "One Stop partners" or "partners" to describe how their various funding streams and resources will be utilized to better serve their mutual customers, both job seekers and employers, through an integrated system of service delivery operated at comprehensive sites known as Idaho Works Career Centers and satellite sites, called Idaho Works Career Connection sites. It is understood that the development and implementation of these Centers will require mutual trust and teamwork among the One Stop partnering agencies and the WDC, working together to accomplish the shared goals."

4.8(b)(1) COOPERATION AND COORDINATION WITH OTHER AGENCIES AND ENTITIES

The Idaho Division of Vocational Rehabilitation does not engage in any programs carried out by the Under Secretary for Rural Development of the U.S. Department of Agriculture.

The Idaho Division of Vocational Rehabilitation (IDVR) and the following entities have

entered into formal agreements, which outline the specific activities expected of each partner. The agreements outline goals, planning processes, information sharing and confidentiality, technology, continuous improvement and accountability, service delivery support, cost sharing, annual action plans, duration, amendments, and termination/conflict resolution. These entities include:

CAP - Idaho Client Assistance Project:

This agreement outlines the interaction between IDVR staff and CAP staff for the improvement of services to people with disabilities in Idaho served under the VR program.

Idaho Department of Health & Welfare - Division of Health –Children's Special Health Program:

The Idaho Children's Special Health Program was formally known as Cripple Children's Services with the Shriner's Hospitals. The agreement facilitates the referral of children ages 16 to 18 with significant disabilities to the IDVR program. It indicates we will work together to ensure appropriate transition to adult life to eligible youth. It further agrees that those needed and allowable services not covered by the existence of comparable benefits or other resources (as defined by the Act's implementing regulations) will be covered by IDVR.

Idaho Industrial Commission:

This agreement outlines the relationship between IDVR and the Industrial Commission with regard to persons injured on the job who may also have other non-work related injuries. The Industrial Commission will be the lead agency for injured workers in Idaho and will refer them to IDVR when they are unable to return to previous or similar employment due to the work related injury.

Idaho Department of Health & Welfare, Division of Behavioral Health, Adult Mental Health (Yearly updated Agreement):

The Idaho Division of Vocational Rehabilitation (IDVR) and the Idaho Department of Health and Welfare, Division of Behavioral Health, Adult Mental Health enter into this agreement for the express purpose of better serving Idahoans experiencing severe and persistent mental illness. A team approach will be used to ensure that the Idahoans served by this Agreement will benefit as to remaining de-institutionalized and successfully integrated into their respective communities from a psychological, psychosocial, and employment perspective. Those consumers who have a severe and persistent mental illness deemed not eligible for this program will be referred to the general IDVR program. Those consumers who have a severe and persistent mental illness deemed ineligible for this program or IDVR services will be referred to appropriate resources for assistance.

Tribal VR (Nez Perce Tribe, Coeur d'Alene Tribe, Shoshone/Bannock Tribe):

The intent of these agreements is to develop and implement a cooperative system for providing vocational rehabilitation services to eligible American Indians with disabilities and to promote and enhance to the greatest extent possible vocational rehabilitation services like that of those provided by the State of Idaho. The IDVR has the basic responsibility to provide rehabilitation services to all eligible individuals of Idaho. The Nez Perce Tribe, Coeur d'Alene Tribe, and Shoshone/Bannock Tribe, through a Federal Section 121 grant, will work cooperatively with IDVR.

Idaho Department of Labor /Data Sharing:

This agreement provides for disclosure of employment security information by the Idaho Department of Labor to IDVR for the purpose of evaluating participants' acquisition and retention of employment and earnings. The Agreement also enables IDVR to meet federal reporting requirements under Section 106 of the Rehabilitation Act as amended by Title IV of the Workforce Investment Act of 1998.

State Use Contracting Programs:

The State of Idaho has a 1973 statute referred to as the "Use Law." A council appointed by the governor facilitates the sale of goods and services from thirteen (13) Community Rehabilitation "Not for Profit" Programs. A cooperative agreement is not necessary.

Community Rehabilitation Programs:

IDVR does not have contracts with Community Rehabilitation Programs as services through these entities are provided on a fee for service basis.

Idaho Department of Correction (IDOC):

The two agreements addressed in the waiver of state wideness establishes guidelines to provide comprehensive vocational rehabilitation services to adult, felony clients/offenders both in an IDOC institution and in the community. In addition, IDVR and IDOC have entered into an MOA that provides for the purchase of training equipment to enable eligible offenders to complete certified training in heavy equipment operation.

Idaho Department of Juvenile Corrections (IDJC):

This agreement established the guidelines to provide comprehensive vocational rehabilitation services to juvenile offenders, both in an IDJC institution and in the community.

Idaho Department of Corrections (IDOC)

This agreement describes the partnerships and responsibilities between the Idaho Department of Correction and the Idaho Division of Vocational Rehabilitation. The intent is to procure equipment and set up a mobile program to train offenders statewide in the basics of heavy equipment operation, using the National Center for Construction Education and Research (NCCER) curriculum. The goal is to provide offenders with skills in heavy equipment operation that will result in increased employability potential in the fields of highway construction, agricultural heavy equipment operation, and/or heavy equipment operation in mining and extraction industries.

Supportive Housing and Innovative Partnerships. Inc (SHIP)

This agreement provides housing assistance to VR eligible residents who have exited the correctional system and are residing in SHIP housing while they participate in a highly structured, time limited employment training and recovery program. The expectation is that relapse rates will be reduced by 45% through this structured process as compared to relapse rates for those not receiving treatment. The program includes the administration of twice weekly random drug tests for VR participants. SHIP will work with eligible residents to evaluate individual work skills, further develop work skill opportunities and training as well as help with job search plans. IDVR will provide vocational guidance and counseling, housing assistance and random drug testing to eligible residents for a specified period of time while the individual participates in this program.

Idaho Educational Services for the Deaf and Blind (IESDB):

This agreement established guidelines and policies to facilitate the referral of IESDB students to the agency for appropriate vocational rehabilitation services and to coordinate the provision of services when the student(s) is/are mutual clients of both entities. This agreement provides for \$60,000 of certifiable non-federal state money to be transferred to IDVR.

Idaho Department of Education/School-Work Transition Cooperative Agreements:

IDVR has entered into twelve consortium assignments that span a myriad of school districts in both rural and metropolitan areas. Each consortium provides a designated counselor and support staff who focuses exclusively upon the school age population within the respective consortium.

Idaho Department of Education - Secondary Transition:

This agreement deals with our mutual definition of secondary transition and the cooperative delivery of services to transitioning students with disabilities. It outlines the

provision of services required from local school districts, IDVR and Idaho Commission for the Blind and Visually Impaired, roles and responsibilities of each agency including financial responsibilities, provisions for determining state lead agencies and qualified personnel responsible for transition services.

Job Club and Job Development Services:

As a result of the significant downturn in the Idaho economy during the past year, the unemployment rate in metropolitan Boise now stands at 9.8%. As a result, caseload size has increased dramatically at the job ready status. In order to mitigate the backlog of employment ready individuals, the agency has entered into a one year contract with a professional job developer. Should the outcomes for this contract demonstrate a dramatic reduction in the backlog of employment ready individuals, IDVR will replicate this contract across the state if the economy remains stalled statewide.

Attachment 4.8(b)(2)
COORDINATION WITH EDUCATION OFFICIALS

Colleges and Professional Technical Programs in Idaho under the State Board of Education:

These Agreements provide coordination of services between IDVR and the universities and colleges in Idaho, so that students with disabilities can succeed in an environment of higher education as outlined in CFR361.22.

The Cooperative Agreements with Colleges and Universities outline information regarding consultation and technical assistance, roles, responsibilities, including financial responsibilities of each, and procedures for outreach to and identification of students with disabilities who need services.

Idaho Department of Education - Secondary Transition:

This Agreement deals with our mutual definition of secondary transition and the cooperative delivery of services to transitioning students with disabilities. It outlines the provision of services required from local school districts, IDVR and Idaho Commission for the Blind and Visually Impaired, roles and responsibilities of each agency including financial responsibilities, provisions for determining state lead agencies and qualified personnel responsible for transition services.

The parties enter into these agreements solely to facilitate the transition of students with disabilities from K-12 public education into adult life. This transition to adult life may involve any or all of the following goal oriented activities: post-secondary education, training and job placement, direct placement into appropriate employment (to include supported employment if required), consultation and technical assistance to assist educational agencies in planning for the transition of students with disabilities, advocacy and any other activities that are relevant to the student and within the scope of the IDVR mission and role.

This Agreement with the Idaho Department of Education and education officials ensures a coordinated, comprehensive system focusing on youth with disabilities as they transition from secondary school to post-school activities, promoting post-secondary education, vocational training, integrated employment (including supported employment), continuing and adult education, adult services, independent living, and community participation emphasizing a team approach to facilitate the transition of students with disabilities from public education into employment. Roles and responsibilities, including financial responsibilities, of each agency, including provisions for determining state lead agencies and qualified personnel responsible for services are

outlined as well. This Agreement also includes referrals of students with disabilities (e.g. physical, medical) who are not eligible for special education services, and students who have a 504 Plan (Rehabilitation Act of 1973), to IDVR for determination of eligibility for vocational rehabilitation services.

This Agreement outlines the local education agency responsibility for the purchase of assistive technology equipment that is required for educational purposes. The Agreement also outlines IDVR responsibility for the purchase of any assistive technology device of equipment that may be necessary for the student's eventual employment. The Agreement also provides a protocol for discounting the cost of equipment purchased by the school for repurchase by IDVR to be utilized in an employment program.

Additionally, IDVR will accept referrals within 2 years prior to the student exiting high school (or earlier if appropriate), determine eligibility and collaboratively, with input from the student's Individualized Education Program (IEP) Team, develop Individual Plans for Employment (IPEs).

School-Work Transition Cooperative Agreements:

IDVR has entered into twelve consortium assignments that span a myriad of school districts in both rural and metropolitan areas. While these projects represent a substantial segment of the agency's services to the transitional population, the Agreement referenced above relates to services in all districts across the state. The Agency's consortium projects include:

1. Panhandle Consortium (Region I)
2. Coeur d'Alene/Post Falls School-Work (Region I)
3. Lewiston School-Work (Region II)
4. Local Consortium of Southern Idaho School Districts (Region IV)
5. Southern Counties Consortium of Schools (Region V)
6. Pocatello School-Work (Region V)
7. Greater Opportunities to Achieve Life Skills Consortium School Districts (Region VI)
8. Canyon, Owyhee and Gem School Districts (Region III)
9. Nampa School District (Region III)
10. Meridian Joint School District #2 (Region III)
11. Boise School-Work (Region III)
12. Mt. View School-Work (Region III)

IDVR also has individual cooperative agreements with other educational entities throughout the state. The goal of these cooperative agreements is to provide the necessary coordination of services at a local level, which will assist eligible individuals who have

disabilities in an educational environment. These agreements are specific in terms of program and financial responsibilities of each party and include:

Idaho Interagency Council on Secondary Transition:

IDVR continues to be involved in the Idaho Interagency Council on Secondary Transition with the purpose of ensuring that youth with disabilities experience a collaborative, comprehensive system that facilitates a smooth transition from secondary school to adult life. The goal of this group is to provide and promote a common conceptual framework that leads to opportunities for youth with disabilities in community living, recreation, continued education, and employment. Interagency cooperative planning, information sharing, and the collaborative use of resources will help accomplish our mission at the state and local level.

Idaho Educational Services for the Deaf and Blind (IESDB):

This agreement established guidelines and policies to facilitate the referral of IESDB students to vocational Rehabilitation for appropriate vocational rehabilitation services and to coordinate the provision of services when the student(s) is/are mutual clients of both entities.

Attachment 4.8(b)(3)
COOPERATIVE AGREEMENTS WITH PRIVATE NONPROFIT
VOCATIONAL REHABILITATION SERVICE PROVIDERS.

IDVR does not establish cooperative agreements with private nonprofit vocational rehabilitation service providers as we purchase services on a fee-for-service basis.

IDVR has implemented two reimbursement methods with private, nonprofit Community Rehabilitation Programs (CRP). These include contracts for services provided on an incremental basis (payments following the provision of selected services) as well as fee-for-service.

IDVR continues to participate as a guest at the quarterly meetings conducted by both CRP associations. The main purpose of the agency participation is to solidify and improve collaborative relationships for the enhancement of service delivery to individuals with disabilities.

The major topics of discussion include:

1. Social Security Work Incentives
2. Contract issues as well as fee-for-service reimbursement issues
3. Methods to improve the partnerships through open communication
4. Strategies to improve provider program outcomes

All new providers of service for IDVR clients must go through a certification and approval process. The Chief of Field Services reviews the qualifications of the vendors providing services to IDVR clients in order to assure the quality of these services, as well as the safety of clients. Vendors are certified through either the Commission on Accreditation of Rehabilitation Facilities (CARF) or Rehabilitation Services Accreditation System (RSAS).

IDVR policy assures that applicants and eligible individuals exercise choice of service providers. Each region throughout the state provides a comprehensive list of CRP services and expertise available, which enables the consumer to make an informed choice in the selection of an appropriate vendor.

In order to demonstrate quality assurance oversight of the CRP vendors, IDVR has requested that each facility submit quarterly performance reports which are provided to the respective credentialing organization that monitors the CRP for on-going compliance of established performance standards.

4.8(b)(4)

EVIDENCE OF COLLABORATION REGARDING SUPPORTED EMPLOYMENT SERVICES AND EXTENDED SERVICES

IDVR is committed to the advancement of opportunities for Idaho citizens with disabilities including those with the most significant disabilities to be employed and to become independent in the least restrictive and most integrated environments. IDVR has established and continues to maintain strong working relationships with pertinent state agencies and other appropriate entities to assist in the provision of supported employment services throughout the state.

IDVR continues to manage extended employment funding which is annually provided by appropriation from the state legislature. One full time employee is responsible for distributing the funding among the participating community rehabilitation programs that offer not only community supported employment but also extended sheltered employment.

IDVR continues to be successful in maximizing the Federal Supported Employment allocation by collaborating with other agencies and organizations to ensure that available resources are identified and utilized in order to maximize the impact of the services for all individuals with the most significant disabilities requiring long-term community supported employment. Included within this collaboration are Medicaid services provided under the Home and Community Based Services Waiver, as well as services provided through the statewide IDVR consortia with the State Regional Mental Health programs.

IDVR counselors work closely with the staff involved with the State Extended Services/Supported Employment program to ensure that eligible individuals are referred and placed on the waiting list to receive long-term community supported employment funding when appropriate. IDVR counselors also assist individuals who desire to move from an extended services environment into competitive and community-based supported employment when appropriate.

Attachment 4.10

COMPREHENSIVE SYSTEM OF PERSONNEL DEVELOPMENT

Data System on Personnel and Personnel Development

Collection and analysis of data on qualified personnel needs and personnel development consistent with the provisions of 34 CFR 361.18 (a) includes the following activities:

- Analysis of current and future staffing needs continues through periodic reviews of turnover rates, promotions and transfers. Anticipatory staffing analysis is ongoing.
- During FFY 2009, the Idaho Division of Vocational Rehabilitation (IDVR) turnover rate for Qualified Rehabilitation Professionals (QRP), Vocational Rehabilitation Counselors (VRC) and Vocational Rehabilitation Specialists (VRS) was 12%. The overall turnover rate for all Vocational Rehabilitation staff was 17%. It is projected over the next five (5) years that the turnover rate for all staff will be between 15% and 20%.
- In the next five (5) years, three (3) out of nine (9) Regional Managers will likely retire. In addition, within the next five (5) years the Field Chief and the Planning and Evaluation Manager will retire. Steps have been taken to provide leadership opportunities to QRP interested in management. The position of Assistant Regional Manager is one such position that offers management experience.
- IDVR will continue to work with legislators to obtain additional full time positions and funding due to the continuing need for increased numbers of vocational rehabilitation staff.
- Idaho's overall population growth slowed considerably in 2009. The state still ranks as the 12th fastest growing state in the nation.
- The agency has determined that a ratio of one (1) QRP for every 20,000 people in the state is an ideal staffing ratio. The population of Idaho is approximately 1.5 million people, thus a minimum of seventy-five (75) QRP over the next five (5) years would be required to meet this ratio. IDVR currently has a total of seventy-two (72) QRP, VRC and VRS, thus three (3) additional are needed.
- Tracking, monitoring and reporting of individual academic preparation, certification pursuits and continuing education for QRP, VRC and VRS is regularly maintained by IDVR.
- IDVR has one hundred and fifty (150) employees; one hundred and twenty-eight (128) of these are Field Staff comprised of nine (9) Regional Managers, three (3) of which are Field Service Managers; seventy-two (72) QRP, VRC and VRS; and forty-seven (47) Vocational Rehabilitation Assistants (VRA). IDVR currently has one vacant position, the Benefits Specialist Counselor.

- The ratio of QRP, VRC and VRS to individuals served is 1:189. An optimal caseload size is approximately one hundred and twenty-five (125). IDVR continues to explore avenues to ensure client needs are met by coordinating services and partnering with other state agencies and entities.

Job Title	Total positions	Current vacancies	Projected vacancies over the next 5 years
Qualified Rehabilitation Professionals, Vocational Rehabilitation Specialists, Vocational Rehabilitation Counselors	72	1	6
Vocational Rehabilitation Assistants	47	2	6
Field Management staff	10	0	4
Benefits Specialist Counselor	1	1	1
HR	2	0	0
Fiscal	5	0	0
IT	6	0	2
Administrator	1	0	0
Planning and Evaluation	2	0	1
Administrative Staff	3	0	0

*Note: one position is a State of Idaho funded position, Extended Employment Services position making the total 150 employees.

IDVR provides feedback to the Rehabilitation Counseling Coordinator at the University of Idaho on existing and future staffing needs, with an emphasis on individuals with disabilities and minorities. In addition, IDVR critiques program content and advises the

Coordinator on specific topics in order to prepare the students for successful placement within the Division upon graduation.

University of Idaho has a Rehabilitation Counseling Master's Program. Currently there are twenty-four (24) students enrolled. One (1) student is an IDVR employee, which the agency sponsors. The twenty-four (24) students enrolled are anticipated to graduate in May of 2010.

Institutions	Students enrolled	Employees sponsored by agency and/or RSA	Graduates sponsored by agency and/or RSA	Graduates from the previous year
University of Idaho	24	1	0	10

Plan for Recruitment, Preparation and Retention of Qualified Personnel

Plans to address current and projected needs for qualified personnel include the following activities:

- IDVR maintains periodic contact with regional universities and gathers information about the numbers of individuals who will be graduating from rehabilitation programs. During the spring 2011 semester the number of individuals anticipating graduation from accredited universities with a Master's Degree in Rehabilitation Counseling are: Western Washington (12), University of Idaho (16), Utah State University (25), San Diego State University (27), University of Wisconsin-Stout (36), and New Mexico Highlands (9).
- Periodic site visits are conducted at the University of Idaho. IDVR staff meets with students and faculty in order to establish relationships and initiate recruitment activities with current graduate students.
- IDVR provides feedback to the Rehabilitation Counseling Coordinator at the University of Idaho on existing and future staffing needs, including individuals with disabilities as well as those with minority backgrounds. In addition, IDVR

- critiques program content and advises the Coordinator on areas needing attention for successful placement of graduates within the Division.
- Periodic contact is made with Western Washington University, University of Idaho, Portland State University, University of Arkansas, Utah State University, University of Northern Colorado at Greeley, San Diego State University, University of Wisconsin Stout, University of Arizona, Montana State University at Billings, New Mexico Highlands University, Texas Tech University, and University of Texas Pan Am. The Division has developed a process whereby each of the nine (9) Regional Managers, the HR Manager and the IDVR Administrator are assigned to different universities that have a Master's Level Rehabilitation Program for recruiting purposes. Each will maintain ongoing relationships to promote communication concerning vacancy announcements and to develop and maintain a pool of qualified QRP applicants. They keep in contact with key personnel at each university, i.e., Department Heads and Internship Coordinators.
 - The HR Manager attends the National Council of Rehabilitation Educators (NCRE) conference annually (contingent on available funding) in order to maintain relationships that promote the type of communication necessary to proactively distribute details of potential vacancy announcements and to assist in maintaining a pool of QRP applicants.
 - The HR Manager sends position announcements to the members of the State Rehabilitation Council (SRC) for them to disseminate to interested applicants. The SRC also conducts annual staff climate surveys for all IDVR employees, compiles and reviews results and offers feedback and recommendations on findings, specifically areas that may need improvement.
 - IDVR continues to face challenges in recruiting qualified applicants. The entry-level wage for QRP is lower than comparable state and private positions.
 - All Regional Managers, Central Office Management and other leadership personnel complete recruitment activities. Development of recruitment and marketing plans continue to be a priority that will lead to an accurate assessment of the recruitment efforts of the Division.
 - Professional organizations such as the local chapter and the national chapter of the National Rehabilitation Association assist in promoting agency recruiting efforts.
 - IDVR participates in Career Fairs to encourage and seek out individuals from diverse backgrounds including individuals with disabilities and from minority backgrounds.
 - IDVR conducts exit interviews with staff, when possible, to determine whether there are areas of concern affecting staff retention that need to be addressed.

Personnel Standards

Establishment and maintenance of personnel standards includes the following activities:

- The State of Idaho does not require a State licensure for rehabilitation counseling. Therefore personnel educational standards established by IDVR for qualified rehabilitation professionals (QRP) are intended to satisfy Federal requirements, 34 CFR 361.18(c).
- IDVR has established three QRP levels: Vocational Rehabilitation Counselor I, II & III (VRC I, II & III).
- The academic standards established by IDVR for the VRC I & II positions include the following: 1) graduation from an accredited university with a Master's Degree in Vocational Rehabilitation Counseling and a Certified Rehabilitation Counselor (CRC) designation obtained by the Commission on Rehabilitation Counselor Certification (CRCC); 2) graduation from an accredited university with a Master's Degree in Vocational Rehabilitation Counseling; 3) a current Licensed Professional Counselor (LPC) or Licensed Clinical Professional Counselor (LCPC) designation issued by the State of Idaho Bureau of Occupational Licensing (IBOL); 4) a Bachelor's degree in a related field and a current CRC designation issued by the CRCC.
- The academic standards established by IDVR for the VRC III position include the following: 1) graduation from an accredited university with a Master's Degree in Vocational Rehabilitation Counseling and a Certified Rehabilitation Counselor (CRC) designation obtained by the Commission on Rehabilitation Counselor Certification (CRCC); 2) a current Licensed Professional Counselor (LPC) or Licensed Clinical Professional Counselor (LCPC) designation issued by the State of Idaho Bureau of Occupational Licensing (IBOL); 3) a Bachelor's degree in a related field and a current CRC designation issued by the CRCC.
- Due to the limited pool of recruits for the QRP positions, IDVR will consider hiring individuals who do not possess the above academic standards. These individuals would be hired into the Vocational Rehabilitation Specialist (VRS) or the Vocational Rehabilitation Counselor (VRC) designation as outlined in the IDVR CSPD policy, HR 1001. As a condition of employment the individuals agree to obtain educational and/or credential standards outlined in the IDVR CSPD policy, HR 1001, within five years of their hire date. These individuals are restricted in their professional latitude to approve eligibilities, plans and case closures.
- IDVR allows current employees who do not meet the certification standards to complete the educational and/or credential requirements within five years. If those employees fail to meet the standards in the allotted time frame, individuals are re-

- classified to a Vocational Rehabilitation Specialist designation. In that capacity, individuals are restricted in their professional latitude to approve eligibilities, plans and case closures. These rights and their former position will be re-instated, upon approval, once they achieve the required credentials.
- IDVR also places emphasis on experience and special skills including but not limited to the following: bilingual skills such as fluency in Spanish; proficiency in sign language; and extensive employment history in specialty areas such as Corrections, School to Work Transition and Mental Health.
 - There are currently fifty-six (56) QRP who meet IDVR CSPD educational standards and sixteen (16) who do not meet the standards.
 - CRC designation is required for all Regional Managers, Field Services Managers and the Bureau Chief. The CRC, LPC or the LCPC designation is required for all VRC III positions.
 - Regional Managers conduct bi-annual assessments of progress towards meeting the CSPD timelines and report outcomes to the HR Manager.
 - Remaining IDVR staff positions, not specifically named in this section, are required to meet the State of Idaho, IDVR and/or State Board of Education (SBOE) minimum standards set for each position description.
 - IDVR requires those QRP, VRC and VRS who have not obtained the CRC credential to follow and abide by the CRCC Code of Ethics http://www.crccertification.com/pages/crc_crcc_code_of_ethics/10.php. VRA and other staff who work directly with IDVR participants will also be required to follow and abide by the CRCC Code of Ethics. A copy of the most current CRCC Code of Ethics is provided to QRP and VRA at time of hire.
 - IDVR provides continued counseling to employees on Division expectations for meeting the requirements as defined by Federal regulations of a Qualified Rehabilitation Professional (QRP) and formalizes plans for achieving outlined goals.
 - IDVR provides financial support through funding from the Basic Support and In-Service Training Grants for coursework to support counselor objectives in meeting CSPD requirements. In FFY 2009, \$10,354 was spent to support this effort.

Staff Development

Activities for staff development to ensure all personnel are receiving appropriate and adequate training include the following:

- Tracking, monitoring and reporting individual training and development of all Vocational Rehabilitation staff. IDVR has a software program that allows staff to

- electronically request training. In addition, it provides ways to track and monitor all training activities.
- An annual training needs assessment is conducted in order to determine personnel training needs. Individual employee skill sets, position descriptions and position duties are also assessed to identify areas that require further development. In addition, organizational needs are analyzed to identify areas in need of succession planning, to expand those employee skills essential in the effective servicing of special populations and to meet job demands. Information gathered from employee performance evaluations, supervisory feedback, employee exit interviews and administrative review results also assists the Agency with identifying areas of need.
 - At the annual IDVR in-service topics presented included the following: The Art of Creating Opportunity; Basic Principles of Pain Management: Focus on Individuals in Recovery; Ethically Deal with Non-compliance and Non-performance Issues; Social Communication and Job Skills of Adults with Autism; Review/Overview of Personality Disorders; Gangs, Drugs and Violence; Mental Health Recovery; How Real are Hollywood Reels: Using Movies to Understand Addiction and Recovery; Approaches to Personality Disorder, Dialectical Behavior Therapy Strategies; Evidence Based Practice; Epilepsy 101; It's All About You; System-Wide Implementation and Integration of Motivational Interviewing in Vocational Services; Maximizing Career Information System (CIS) for VR and Clients and Counselor Safety.
 - Throughout the year training requests are approved for individual staff to attend training in areas of interest or need. In FFY 2009 topics, conferences and titles have included the following: Dealing with Difficult People; American Sign Language courses; Tools for Life; Disability Determination training; Idaho Counseling Association Conference; We Are Family (Statewide Conference for Idahoans with Disabilities); Ethics; Students with Disabilities: Mentoring and Other Possibilities for Work and Education; Information Technology; Computer Networking; Foundations in Vocational Rehabilitation; Keeping the Promise; Idaho's Summit on Drop Out Prevention; Emerging Trends in Career Development; Women and Work Conference; Working with People who are Deaf and Hard of Hearing; Physical Disabilities; Vocational Services for People who are Deaf and Hard of Hearing; Strategic Grant Proposal Writing Workshop; Idaho Conference on Alcohol and Drug Dependence (ICADD); Sixth Judicial District Drug and Mental Health Court Mini Institute; Substance Use Disorder and VR; Gangs, Drugs and Violence in Idaho; ADA Amendment Act of 2008; Powerful Communication Skills for Women; Assistive Technology Training Expo; The Mentally Ill in Jail: Whose Problem Is It Anyway?; Criminal Offender Employment Services; Curriculum and Partnership Opportunities with VR, Center for Continuing Education in Rehabilitation (CCER) Teleconference Series;

New Employee-Job Shadowing; Ethics for Supervisors; National Rehabilitation Association Conference; Overview of Self-Employment for Entrepreneurs with Disabilities; Dreamweaver Software Application Training; CIS Boot Camp; Employment Training on the ADA; 2009 Annual Seminar on Worker's Compensation; CPI Annual Conference "Keep Moving Forward"; Suicide Prevention Conference; Offender Workshop Development Training; Adobe Photoshop; Idaho Juvenile Justice Association (IJJA) Conference; Mental Health Recovery Conference; Fetal Alcohol Syndrome; Vocational Rehabilitation and Autism Spectrum Disorders; and Improving Psychiatric Rehabilitation Competence. In addition, participation in extensive training for enhancing technological skills is provided.

- Management development training for QRP and other staff members is provided to enhance skills for current jobs or future advancement opportunities. In FFY 2009 staff members participated in the Emerging Leaders series developed and offered by CCER Leadership Institute.
- IDVR also identifies current staff members who are subject matter experts who assist with training development and facilitating. Trainings developed that are facilitated by IDVR staff are Caseload Management and Critical Case Questioning. IDVR will explore other training topics as needed.
- Current VRA employees successfully completed the comprehensive training program and have successfully transitioned to their current paraprofessional status. In addition, all new VRA employees are required to complete this training series by taking the four courses of study as follows: Disability History, Developing Collaborative Relationships, Sticky Situations, and Developing Cultural Competence within the first year of employment (or when training is available).

Personnel to Address Individual Communication Needs

Communication with Diverse Populations:

Activities to ensure employment of personnel who are trained to communicate in special languages are as follows:

- IDVR continues to participate in state/regional conferences on Hispanic culture and issues.
- Candidates who are fluent in Spanish are recruited and placed within specific areas of the State to serve the needs of the Hispanic community.
- Since Idaho has a separate entity that addresses issues related to low vision and blindness, IDVR does not provide specific training to its staff in Braille.

- Training is provided in the area of deaf and hard of hearing as needed and candidates who are fluent in American Sign Language and/or can communicate with this population are placed within specific areas of the State to serve the needs of the Deaf and Hard of Hearing community.

Coordination of Personnel Development under the Individuals with Disabilities Education Act:

- A Regional Manager has been assigned as an active member of the Idaho Interagency Council on Secondary Transition, which promotes interagency cooperative planning, information sharing, and the collaborative use of resources at the state and local level. This Council works to ensure that training needs are adequately identified and then addressed through shared training opportunities. These opportunities include Tools for Life: Secondary Transition and Technology. Jacque Hyatt, Specialist for the Idaho Department of Education Bureau of Special Populations visits approximately five schools each year and invites a QRP to conduct joint trainings with school district personnel, parents, and students with disabilities. Additional activities include QRP attendance at statewide school district transition fairs where they speak with school personnel, parents, and students with disabilities.

**Attachment 4.11(a):
COMPREHENSIVE STATEWIDE ASSESSMENT**

In response to the requirements of Section 101.15 (a) of the Rehabilitation Act as amended, the Idaho Division of Vocational Rehabilitation (IDVR), in partnership with the State Rehabilitation Council (SRC), draws from many sources to assess thoroughly the needs of Idahoans with disabilities. The current Statewide Needs Assessment spans FFY 2011-2013. The Statewide Comprehensive Needs Assessment will continue to be conducted on a triennial basis and will include case reviews, consumer satisfaction surveys, focus groups of people with disabilities, town meetings conducted annually in major metropolitan areas of the state, as well as information gathered from community rehabilitation programs statewide. Additionally, counselors assigned to specialized populations (deaf and hard of hearing, transition, corrections, mental health, migrant and seasonal farm workers, American Indians, as well as Hispanics) elicit input not only from the client population but from others who provide services to these populations including input from various state boards and groups focused on the needs of people with disabilities.

Other facets of the IDVR Needs Assessment include:

1. A Strategic Planning process involving a rolling three-year plan which is updated annually. The strategic plan has become an important tool in the decision making process that affects the day-to-day operations of IDVR. Input is solicited from IDVR staff, the CAP, the SRC, and the SILC. Primary focus areas include:
 - Service delivery with an emphasis on continued improvement in the quality of service delivery
 - Minority populations and other targeted populations
 - Deaf and hard of hearing
 - Strengthened partnerships with shareholders
 - Enhanced revenue opportunities for all VR programs
 - Transitioning students
2. Comprehensive Statewide Needs Assessment Survey:
The survey was designed to evaluate the degree to which IDVR is addressing the rehabilitation needs of the demographic populations encompassed within this state.

Groups targeted for their input and statewide representation included:

- Client Assistance Program (CAP)
- A variety of specific disability advocacy organizations, e.g. Parents Unlimited, NAMI
- Statewide transition partners

- Consumers
- Colleges and Universities
- State Mental Health Council and mental health providers
- State Independent Living Council
- State Rehabilitation Council
- Developmental Disability Council
- Task Force on the ADA
- Adult Corrections
- Juvenile Corrections
- WIA partners
- Department of Labor
- Industrial Commission
- Local and statewide school personnel
- Local Chambers of Commerce
- Idaho Migrant Council
- Health related organizations
- Veterans Administration
- Commission for the Blind and Visually Impaired
- American Indian Tribal representatives and 121 projects
- Idaho Inclusiveness Coalition
- IDVR staff
- Community Rehabilitations Programs

A total of 381 responses were recorded. In addition, responses were recorded from the wide spectrum of sources that were tapped throughout the state including focus groups of people with disabilities, town meetings, responses procured from community rehabilitation programs, counselors assigned to specialized populations, as well as various state boards and groups focused on the needs of people with disabilities. Five major themes were identified that are capable of being addressed within the purview of IDVR.

Those themes were:

1. **Hispanic population:** A significant number of responses focused upon the need to ingress this population more effectively. An analysis of this need indicated an expanding population which constitutes 10.2% of the statewide population. It was further noted that during FFY 2009 the Hispanic/Latino population constituted 8% of the entire clientele served by the agency.
2. **Outreach to other targeted minority populations:** Historically, the population of Idaho has not included a variety of minorities. During the most recent statewide needs assessment it was determined that various minorities have begun to migrate

into the state and together constitute a statistically significant population that is currently underserved. Those populations include African Americans, Asian Americans, American Indians and Alaska natives. Additionally, due to the increase of the lifespan of Americans, older workers are choosing to extend their employment activity into the later years and, therefore, constitute another underserved minority population.

3. **Transitioning Students:** It was determined that IDVR should more closely collaborate with statewide educational partners in order to identify and promote vocational goals that reflect labor market trends within the state and correlate with the interests and aptitudes of the student. Some responses received reflected issues beyond the scope of VR services alone, including the lack of effective family support, inefficient school sponsored work experiences, and a stronger network and coordination among agencies designed to provide the essential support required to ensure the acquisition of meaningful employment that will result in self-sufficiency.
4. **Deaf and Hard of Hearing:** The statewide assessment identified a need to increase agency capacity to provide substantial vocational services to this historically underserved population.
5. **Supported Employment Services:** The following comments were recorded in regard to this topic: A stronger focus on community based, integrated employment rather than sheltered employment (work services), increased long-term funding for supported employment, and a reduction of the waiting list for funding of supported services. During FFY 2009 efforts were made to increase this budget but with no success. Due to the current state of the economy, it is not anticipated that any additional money will be allocated to this service over the next few years.

Individuals with the most significant disabilities, including Supported Employment:

IDVR is not operating under an order of selection and is able to serve all eligible Idahoans. At the end of FFY 2009, 97% of all cases open during the year were coded as either significantly disabled (SD) or most significantly disabled (MSD). No one was closed in extended employment in a non-integrated setting.

The Comprehensive Needs Assessment reinforced the need for additional state-only funds designated for long-term support. There is a strong consensus among shareholders regarding the need to work closely with IDVR to craft a solution to the long-term support funding shortfall.

Additionally, a stronger focus on community based employment outcomes rather than

sheltered workshop (extended employment) has been identified as a need for this population.

It should be noted that all clients served in supported employment meet the classification of MSD. IDVR monitors the proper coding of MSD through its on-going case review process.

Through representation on the SILC, IDVR provides significant input into the development of the State Plan for Independent Living (SPIL). The SILC conducted a series of focus groups across the state to gather input on the needs of individuals with disabilities, particularly those with the most significant disabilities. IDVR incorporated the results of these focus groups into its Comprehensive Needs Assessment.

Service Needs of Individuals with Disabilities who are Minorities:

IDVR addresses services to minority clients through the hiring of a culturally diverse staff, by providing cultural diversity training to IDVR staff, by hiring bi-lingual vocational counselors to ingress the Hispanic population, and by collaborating with the three Section 121 Tribal Vocational Rehabilitation (TVR) grantees.

The most recent census data indicates that Idaho's two largest minority groups include: Hispanics at 10.2% of the state's population and American Indians are at 1.5% of the state's population. In FFY 2009, Hispanics comprised 8.2 % of IDVR clients served. American Indians comprised 3.4 % of IDVR clients served. Historically, particular areas of the state with higher Hispanic populations have been underserved because of the unique barriers related to the culture, which make it difficult to attract participation from that population.

It is important to note that efforts were undertaken to solicit responses from the Hispanic population in regard to the Comprehensive Needs Assessment. In reality, because of the cultural disconnect between this population and government programs, the rate of response was marginal. However, this disadvantage was partially mitigated by the bi-lingual counselors serving this population who were able to elicit some meaningful responses not only from clients but from collateral support sources.

Individuals with Disabilities who have been Unserved or Underserved:

Historically, transitional students in Idaho have experienced significant barriers when exiting the school system and entering the world of work. The following barriers have been identified:

- More vocational training at the high school level needed (lack of work skills)

- Knowledge of procedural details related to scholarships, applications (employment or school), resumes, etc.
- Difficulty accessing community resources
- Family support/attitudes
- Limited job opportunities in small communities
- Fear of losing SSA benefits
- Lack of work ethics and experience
- Substance abuse issues
- Transportation

IDVR has identified the transitional population as a major focus area in its current State Plan. The barriers noted above will continue to be addressed by IDVR and partners as outlined in Goal #3 of the State Plan.

Individuals with Disabilities Served through Other Components of the Statewide Workforce Investment System:

IDVR is an active participant in the Statewide Workforce Investment System. Each region of the state has established a regular schedule of participation within each One Stop Center. In one particular region the VR counselor is permanently housed within the One Stop Center.

IDVR continues to provide training and information to One Stop Center partners on disability related issues, thus increasing the willingness and ability of all partners to serve individuals with disabilities.

While no specific concerns or problems were identified regarding the relationship between IDVR and the One Stop centers, IDVR will continue to build upon the partnership developed to date.

Assessment of the Need to Establish, Develop, or Improve Community Rehabilitation Programs (CRP) within the State:

IDVR maintains a CRP specialist who serves as a liaison with CRPs and is vested with the responsibility for insuring that services are delivered consistent with IDVR standards.

There are thirty seven Community Rehabilitation Programs in Idaho. Twelve of them belong to a traditional association called ACCSES IDAHO and the remainder are realigning with a new association called Vocational Services of Idaho (VSI).

The majority of the ACCSES-IDAHO are accredited by Commission on Accreditation of Rehabilitation Facilities (CARF). The remainder of the CRPs is accredited by Rehabilitation Services Accreditation System (RSAS).

IDVR monitors all CRPs to ensure that they are properly accredited before they are accepted as viable vendors. This monitoring is ongoing to ensure that the accreditation remains active.

Idaho is a predominantly rural state. In several of the rural areas there is very limited choice with regard to CRP vendors available. IDVR continues to facilitate on-going discussions with interested stakeholders to address this particular need.

Attachment 4.11(b)
ANNUAL ESTIMATES

ANNUAL ESTIMATE OF INDIVIDUALS TO BE SERVED AND COST OF SERVICES

The estimated number of all individuals who are eligible for services under this State Plan: 13,000

IDVR is not in an order of selection.

Category	Title I or Title VI Funds	Estimated Number to be Served	Average Cost of Services
Title I Part B	\$9,408,314	3550	\$2,895
Title VI Part B	\$297,000	200	\$2235
			—
			—
			—
			—

			—
Totals	\$9,705,214	3750	\$5140

Attachment 4.11(c)(1):

STATE'S GOALS AND PRIORITIES FOR FFY 2011-2013

The goals and priorities for the Idaho Division of Vocational Rehabilitation (IDVR) are reviewed annually and revised as necessary based on input from a variety of sources including the State Rehabilitation Council (SRC), Agency staff, State Independent Living Council (SILC), Client Advocacy Program (CAP), Tribal VR representatives, the Statewide Comprehensive Needs Assessment, the Field Services Employee Council and the IDVR Management team.

The goals and priorities are developed using information from the FFY 2010 Comprehensive Needs Assessment, findings and recommendations from monitoring activities conducted under Section 107, first hand observation and experiences of the rehabilitation managers and Field Services Employee Council, input from organizations mentioned in the previous paragraph, and the expectations defined by federal standards and indicators. These goals and priorities were jointly developed and agreed to by IDVR and the State Rehabilitation Council.

The goals and priorities identified for inclusion in this State Plan will be:

- Measurable
- Attainable
- Meaningful based upon the unique needs and circumstances of Idaho, keeping in mind the rural nature of this state and the limited resources available
- Consistent with IDVR mission and principles
- Disseminated to staff and evaluated annually
- Consistent with federal standards and indicators

Goal #1 Hispanic Minority Population: Comprehensive vocational rehabilitation services are readily available to the Hispanic minority population.

Objective for Goal #1:

1.1 Hispanic population: From 2000 to 2008 this population increased 51% across the state according to the Idaho Department of Labor Statistics. Persons of Hispanic or Latino origin represented 10.2% of the entire population of the state. In FFY 2009, IDVR served 1122 Hispanic or Latino people. This constituted 8% of the total population served by the agency. The objective will be to increase the percentage of Hispanic/Latinos served by 1% annually over the next three federal fiscal years (FFY 2011- 13). Baseline established by the FFY 2010 IDVR statistics.

Strategy:

- The Agency will implement an effective radio advertising campaign in the regions that experience a high density of this population in order to increase community awareness.
- Identify community resources available as referral sources.
- The agency will continue to apply for available migrant and seasonal farm worker grants that will provide resources for outreach and service to this population.
- Due to the high number of Hispanics in Southwestern Idaho, a job club strategy will be implemented in order to maximize successful outcomes.

GOAL#2 Outreach to Targeted Populations: Comprehensive vocational rehabilitation services are readily available to non-Hispanic minority groups and the aging population.

Objectives for Goal #2:

2.1 Non-Hispanic minority groups continue to expand within the state as illustrated by the 2010 tri-annual needs assessment and general population estimates. The minority groups representing the greatest percentage of growth in residents within the state of Idaho between the time period of 2000 to 2008 include:

Black/African American - 115%

Asian - 37%

American Indian and Alaska native - 21%.

In order to meet the needs of these growing minority populations, IDVR will increase the number served by 1% per year over the next three year time frame (2011-2013). Baseline established by the FFY 2010 IDVR statistics.

Strategy:

- The agency will work with various community organizations to help locate these individuals.
- Coordinate efforts in order to effectively accommodate any cultural or disability issues that could constitute a barrier to the application process.
- Due to the concentration of these targeted populations in Southwestern Idaho, a job club strategy will be implemented in order to maximize successful outcomes.

2.2 Aging population: Due to the statistical increase in the life span of Americans, older workers (age 45 and over) are choosing to extend their employment activity into

the later years. With the onset of a severe and prolonged economic recession, it is increasingly more difficult for older workers with disabilities to compete in the work force. Although IDVR has historically served this population, the needs are greater at this time. It is necessary for the agency to commit more resources and effort to the assistance of this segment of the population. Over the next three year period, IDVR will target an increase of 1% annually in the total numbers served. Baseline established by the FFY 2010 IDVR statistics.

Strategy:

- Collaboration with the Office on Aging to identify and recruit potential applicants who could benefit from vocational rehabilitation series.
- Due to the concentration of this targeted population in Southwestern Idaho, a job club strategy will be implemented in order to maximize successful outcomes.

Goal # 3 Transitioning Students: Based on a better understanding of post-secondary training/employment options, transitioning students achieve a positive employment outcome.

Objectives for Goal #3:

3.1 IDVR and statewide educational partners will identify and promote vocational goals that reflect labor market trends within the state and correlate with the interests and aptitudes of the student. This will be documented through a description within the case file outlining the variety of training and vocational options identified and measured by an increase in the number of employment outcomes by a minimum of 2% per year. Baseline to be established in 2010.

Strategy:

- VR counselors will confer with school personnel, the student and, when appropriate, a parent or guardian to identify an appropriate vocational goal.
- The counselor will verify by an entry in the case file that the full spectrum of vocational possibilities has been presented to the client during the vocational guidance and counseling process.
- The Regional Manager of Region III and Special Education staff will work together to plan and coordinate workshops for educators and vocational

counselors. The curriculum will include topics designed to enhance the knowledge and understanding of issues relevant to transitioning students.

3.2 Through closer collaboration with Idaho school districts, students with disabilities participating in charter school programs, as well as those participating in on-line schooling and virtual/internet high schools will be more effectively identified and served. In addition, IDVR will target the 504 transitional population, both inside and outside the consortium projects. A baseline will be established in FFY 2011 and the number served will be increased by 1% each subsequent year.

Strategy:

- VR counselors will work closely with their special education partners to identify eligible students enrolled in participating charter schools and on-line virtual/internet high schools who otherwise may not have knowledge and awareness of VR transition services.

Goal #4 Deaf and Hard of Hearing: A broad spectrum of meaningful vocational services is available to this historically underserved population.

Objectives for Goal #4:

4.1 During FFY 2010, a greater emphasis was focused upon on this population by the creation of a full time specialized counselor position serving four regions in the Treasure Valley. It is anticipated the counselor will have a full time caseload by the end of FFY2011. The impact of this additional position will be measured by an increase of 1% per year in the number of deaf or hard of hearing individuals served statewide over the next two year time frame. Baseline established by IDVR 2009 data.

Strategy:

- The VR counselor located in the Treasure Valley is responsible for serving this population exclusively.
- This counselor will network with community organizations including schools in which the deaf population is served.
- This counselor will cultivate referral sources across the state and will collaborate with other counselors who provide services to this particular population.

4.2 During FFY 2009, a cooperative agreement was established between IDVR and the Idaho Educational Services for the Deaf and Blind (IESDB). IDVR agreed to fund two full time IESDB employees whose responsibility is to locate and refer deaf or hard of hearing transitioning students to IDVR for services. IESDB specialists will work in conjunction with IDVR to support the development of appropriate IPE strategies. The success of this collaborative effort will be measured by a 4% increase in the number of referrals from IESDB to IDVR during the next three year time frame. (FFY2011-2013) Additionally, the number of rehabilitations for this population will increase 6% between FFY2011 and the completion of FFY 2013. Baseline established by IDVR FFY 2010 data.

Strategy:

- These two specialists will refer deaf/hard of hearing students to VR counselors statewide for application and eligibility determination.
- The IESDB specialists will utilize contact funding to provide additional support services to eligible students.
- The IESDB specialists will utilize their networking skills and experience to improve access to comparable community benefits.
- The IESDB specialists will also actively participate in the placement and follow along process.

4.3 Within the timeframe of the 2011-2013 State Plan, IDVR will collaborate with the Idaho State Department of Financial Management to determine the feasibility of a reorganization of the Council for the Deaf and Hard of Hearing (CDHH) and subsequent integration of that council into IDVR. The purpose of this integration will be to enhance the statewide effectiveness of vocational services to this population. The council has historically functioned as the primary advocacy group for the interests of the deaf and hard of hearing population. In its role as a service unit within the agency, the primary duty of CDHH will be to collaborate with field staff to increase access to employment, education and social-interaction opportunities for eligible deaf and hard of hearing individuals. Additionally, CDHH will provide the following:

1. A network through which all state and federal programs dealing with the deaf and hard of hearing can be channeled,

2. Encourage consultation and cooperation among departments, agencies and institutions serving the deaf and hard of hearing,
3. Determine the need for further services and make appropriate recommendations to agency staff as well as government officials to ensure that the needs of deaf and hard of hearing are best served,
4. To monitor consumer protection issues that involve the deaf and hard of hearing within the state,
5. Submit periodic reports to the governor, the legislature and departments of state government regarding the manner in which federal and state programs, rules and regulations, and legislation affect persons with hearing impairments.

Strategy:

- All pertinent state and federal entities will explore the applicable laws and regulations.
- Should feasibility be determined, a plan will be developed to consolidate the Council for the Deaf and Hard of Hearing into the IDVR structure.

Attachment 4.11(c)(3)
ORDER OF SELECTION

IDVR is not currently in order of selection.

**Attachment 4.11(c)(4):
GOALS AND PLANS FOR DISTRIBUTION OF TITLE VI, PART B FUNDS**

IDVR uses all funds received annually under Section 622 of the Act for the provision of Supported Employment (SE) services for eligible individuals with the most significant disabilities who require supported employment to become employed and who have selected SE as the appropriate employment strategy following a comprehensive assessment of rehabilitation career job needs. All of these funds are allotted as direct client service funds to all IDVR Regional Offices. Individuals receiving services under this funding are experiencing multiple issues that may include extended learning requirements, inappropriate job behavior, difficulties in interaction with the supervisor, coping with changes on the job such as job tasks, coworkers, supervisors as well as transportation issues.

Supported Employment services include situational assessment, job placement and job coaching, placement and follow-along, as well as transportation and other supportive services when justified.

FFY 2009 Supported Employment goals and outcomes include the following

1. The number of individuals entering community based integrated employment will be equal to or greater than the previous year's total.

Not met: The annual average number of clients in community based integrated employment has gone down from 52% in 2008 to 51% in 2009. One factor that may contribute to the decline is that clients are losing their community jobs due to the poor economy and are requesting to work in work services while they look for a new community job. Additionally, several group work opportunities were lost because hotels/motels and other janitorial contracts with community rehabilitation programs were not renewed due to the economic downturn.

2. Increase funds available for long term supported employment services by 1% utilizing a variety of creative methods over the next two years.

Not met: Due to state budget cuts and the current economic condition, additional funds were not procured in FFY 2009.

3. Number of Supported Employment outcomes will be equal to or greater than the previous year's total.

Not met: FFY 2008 supported employment outcomes totaled 194. FFY 2009 supported employment outcomes totaled 154.

The priorities for the strategy for FFY 2011-13 include the following:

1. A continued emphasis on community based integrated employment rather than sheltered employment (work services)
2. Pursuit of increased long-term state funding for supported employment
3. Continued efforts towards a reduction of the waiting list for funding of long-term supported employment services
4. Investigation into the possibility of being approved as a Medicaid service provider for the purpose of procuring additional vocational funding.

FFY 2011-13 Supported Employment goals include the following:

1. The number of individuals leaving the waiting list and entering community based integrated employment will be equal to or greater than the previous year's total.
2. Increase funds available for long term supported employment services by 1% utilizing a variety of creative methods including identification of natural supports.
3. Number of Supported Employment outcomes will be equal to previous year's total.

Attachment 4.11(d)
STATE STRATEGIES

The following strategies have been identified to support the needs identified in the FFY 2010 Comprehensive Statewide Needs Assessment as described in Attachment 4.11(c)(1) and the agency goals and priorities. These strategies will be implemented in order to achieve agency goals and priorities, support innovation and expansion activities, and overcome any barriers to accessing the vocational rehabilitation and supported employment programs.

These strategies are subject to change due to the nature of the strategies and the continuous evolution of concerns related to disability issues in the state. The agency continuously monitors these strategies based on current circumstances, striving to stay in tune with the needs of Idahoans with disabilities.

Attachment 4.11(d)(1)(A):
EXPANSION AND IMPROVEMENT OF SERVICES TO INDIVIDUALS WITH DISABILITIES AND ASSISTIVE TECHNOLOGY SERVICES AND DEVICES

Innovation and Expansion:

IDVR will provide funding support for the State Rehabilitation Council expenditures including travel, lodging, advertising for town meetings, supplies, meeting room rentals, interpreters when necessary, facilitation services, and costs related to consumer satisfaction/outreach surveys.

Cost: \$25,533.00

Funding support for the State Independent Living Council (SILC) will be allocated out of Innovation and Expansion funding. In FFY 2011 IDVR will distribute \$5,000 of Title I funds to the SILC to be utilized in support of the five designated duties outlined under CFR 364.21.

Cost: \$5,000

Strategy 1: Assistive Technology Services and Devices

IDVR will continue to focus upon efficient usage of rehabilitation technology enhancements as they become available on the market. This equipment will be utilized to overcome barriers that would otherwise impede the achievement of a desired vocational outcome.

During FFY 2009 IDVR established a new counseling position to address the deaf and hard of hearing population located within the Boise metropolitan valley. In an effort to facilitate and refine services to this population, several state-of-the-art rehabilitation technologies are being incorporated within the service delivery process. These technologies will include the implementation of video phones. Secondly, internet interpreting services will be provided to the clientele through the implementation of webcams and microphones. Thirdly, IDVR is currently in the process of translating into an ASL video format all pertinent IDVR forms that are utilized by clientele. IDVR will also provide access to these forms on the agency's internet website. These services will be implemented on an on-going basis and will continue to be upgraded as technologies progress.

Even though the services outlined above are currently being associated with the Boise position, these technologies will also be available commencing in FFY 2011 on a statewide basis to other agency personnel who provide services to this population.

Strategy 2: Expansion and Improvement of Services to Individuals with Disabilities

- IDVR continues to refine a review instrument used for internal casework audits that identifies current practices that do not meet Agency or Federal standards as well as examples of "best case practices".
- IDVR has revised the case closure checklist in order to ensure that it complies with agency policy and federal requirements.
- IDVR will continue to collaborate with other state agencies and organizations to address disability related issues as they arise.
- IDVR staff will participate on regional or statewide transportation committees that are developed to expand or create options for public transportation and to represent the interests of Idahoans with disabilities.
- IDVR will actively support clients in their participation in Mental Health Court in communities where this program has been implemented.
- IDVR will continue to invite community rehabilitation partners to attend relevant trainings sponsored by IDVR, including the annual in-service training when appropriate.
- IDVR will continue to extend invitations to the Tribal VR representative to attend quarterly IDVR management meeting and staff trainings.
- IDVR will work closely with the Inter-Agency Secondary Transition Working Group and other interested organizations to share information and develop cooperative strategies that address the full spectrum of issues faced by transitioning youth.

- IDVR has initiated a cooperative agreement with the Idaho Education Services for the Deaf and Blind that utilizes the skills and expertise of IESDB staff in the recruitment and placement of eligible individuals who are deaf and hard of hearing.
- IDVR transition counselors will work closely with school district special education directors and staff to provide VR orientation regarding the rationale behind the selection of the vocational goal for the IPE.
- IDVR will identify a staff from each region who will be responsible for identifying job/labor markets trends in the local economy in order to provide relevant and timely vocational guidance
- IDVR will utilize ideas that are generated from the employee "think tank" meetings in the planning and delivery of services. Examples include but are not limited to: 1. Electronic linkage between work ready clients and employers 2. A listing of work ready clients in specific employment categories.
- IDVR will continue to collaborate with state Mental Health officials to develop collaborative means of bridging gaps in vocationally related mental health services caused by a decrease in overall funding of the mental health programs.

Attachment 4.11(d)(1)(B):

OUTREACH TO SERVE THE MOST SIGNIFICANTLY DISABLED WHO ARE MINORITIES OR UNSERVED OR UNDERSERVED

Strategy 1: Deaf and Hard of Hearing

The triennial needs assessment conducted in 2010 specifically identified as underserved, individuals who are deaf or hard of hearing. A major emphasis is being undertaken as evidenced by the Agency's stipulated intent identified in Goal #4 (see section 4.11(c)(1)) to increase agency capacity to serve this population by the creation of a full time specialized counselor position serving four regions in the Boise valley. Additionally, the agency has agreed to fund two full time positions to be housed within the Idaho Educational Services for the Deaf and Blind whose responsibility is to locate and refer deaf or hard of hearing transitioning students to IDVR for services. These resources will be used to increase the percent of individuals participating in community based, integrated, employment.

IDVR, in association with the governor's office, is analyzing the feasibility of integrating the Council for the Deaf and Hard of Hearing into the agency. The agency will advocate for this integration for the following reasons: 1. The primary mission of the council is to provide the deaf and hard of hearing with increased access to employment opportunities, 2. Increase awareness for the needs for the deaf and hard of hearing through educational programs, 3. Encourage consultation and cooperation among departments, agencies and institutions serving the deaf, 4. Provide a network through which all state and federal

programs dealing with the deaf and hard of hearing individuals can be channeled, and 5. Monitor consumer protection issues that involve the deaf and hard of hearing population.

Strategy 2: Hispanic/Latino

The primary minority and underserved population in Idaho is the Hispanic population, many of whom enter the state on a seasonal basis to work in agriculture. IDVR will continue to outreach and serve the Hispanic and well as the Migrant and Seasonal worker population. The Agency will implement an effective radio advertising campaign in the regions that experience a high density of this population in order to increase community awareness of this population and identify community resources available as comparable benefits. This particular demographic population experiences a large number of individuals with the most significant disabilities based upon the labor intensive nature of the work and other occupational hazards related to seasonal and migratory farm work as well as cultural and education barriers. All of these areas of need will be taken into consideration in the development of comprehensive rehabilitation plans.

Strategy 3: Black, Asian, American Indian and Alaska Native

Although Idaho historically has experienced a very low percentage of minorities within the state, the latest figures from the Idaho Department of Labor indicate that certain minority groups are expanding. The latest figures from the Idaho Department of Labor as well as the 2010 tri-annual needs assessment indicate that certain minority groups are increasing in various regions of the state. IDVR has committed to increasing the service and outreach to minority individuals as outlined by the agency's intent in Goal #2 (see section 4.11(c)(1)) to increase service capacity to the Black, Asian, and American Indian and Alaska Native populations. The agency will work with various community organizations to help locate these individuals and coordinate efforts in order to effectively accommodate any cultural or disability issues that might create a barrier to successful employment.

Strategy 4: Collaboration with Section 121 Projects

In Idaho, there are currently three Section 121 Vocational Rehabilitation projects serving the American Indians. General IDVR counselors meet minimally on a monthly basis with the three projects. IDVR general counselors will open tribal cases periodically when requested by an individual or a project representative.

Attachment 4.11(d)(1)(C):

DEVELOPMENT AND IMPROVEMENT OF THE STATE COMMUNITY REHABILITATION PROGRAMS (CRPs)

Strategy 1:

In Idaho, the CRP programs function as independent vendors structured on a fee for service basis. In order to assure the highest quality service outcome to agency clientele, each vendor must be certified by one of two National Certification entities. The first is the Commission on Accreditation of Rehabilitation Facilities (CARF). The second is the Rehabilitation Services Accreditation System (RSAS).

Strategy 2:

Alliance Enterprises, the company providing case management software to IDVR, has invited IDVR to participate in the research and development of new software designed to monitor and evaluate the performance outcomes related to CRP services as well as other vendor services. This research is currently on-going and will be finalized within the next two years. (2011-2012) Once the pilot program has been completed, if the objectives have been achieved, IDVR will assess the effectiveness and will make a decision regarding implementation.

Strategy 3:

IDVR has engaged with the CRP partners to expand and improve the quality of services to agency clients. The agency will collaborate with its partners to improve facility infrastructure, quality of training, accessibility to transportation and ultimately the enhancement of successful employment outcomes.

**Attachment 4.11(d)(1)(D):
IMPROVEMENT OF THE STATE'S FEDERAL EVALUATION STANDARDS
AND PERFORMANCE INDICATORS**

Strategy:

In FFY 2009, IDVR again failed to meet standard 1.1. The Agency continues to closely monitor monthly performance levels to ensure that the outcomes for FFY 2010 will reflect compliance with all indicators.

Additionally, IDVR regularly educates management and staff regarding their responsibilities towards meeting these goals. Progress is monitored regularly by the Field Services Chief.

**Attachment 4.11(d)(1)(E):
STRATEGIES FOR ASSISTING OTHER COMPONENTS OF THE STATEWIDE
WORKFORCE INVESTMENT SYSTEM IN ASSISTING INDIVIDUALS WITH
DISABILITIES**

Strategy 1:

IDVR continues to be actively involved as a Workforce Development partner in Idaho. A representative from IDVR regularly attends meetings with other Workforce Development partners to help set the agenda for the Workforce Development Council meetings to ensure relevant topics are included for discussion or vote, to share important information regarding agency/community resources for mutual clientele, and provide information to the Board on selected issues. The partners promote system integration to the maximum extent feasible through the cross training of staff and participation in a continuous improvement process designed to increase outcomes and customer satisfaction. IDVR will strive to maintain this high level of cooperation and participation.

Strategy 2:

IDVR staff continues to have a close working relationship in each of the One-Stop Centers across the state. At least one IDVR staff member is assigned at each of the local One-Stop Centers. The staff member has a regular schedule of attendance at the One-Stop or is on call with a five-minute response time due to the close proximity of the offices. The partners share resources where possible in accordance with each agency's guidelines when working with common clientele. IDVR will continue to maintain a close working relationship with the One-Stop Centers and partner agencies.

The IDVR HR Manager and the Organizational Development Specialist are currently working in collaboration with the Idaho Department of Labor Employer Association to survey state employers to determine HR training needs.

Strategy #3:

IDVR is partnering with the U.S. Department of Labor Apprenticeship and the Idaho Department of Labor (IDOL) on an apprenticeship project. The project is designed to enhance the skills and knowledge of employment specialists who work for CRP's within the State of Idaho. Employment specialists throughout the state provide job placement services for both IDVR and IDOL participants. By enhancing their skill sets and knowledge base in the areas of job placement, counseling theories, medical/psychosocial aspects of disability, vocational evaluation and other topics that are important to learn when working with individuals with disabilities, it is believed that our participants will obtain higher quality employment outcomes to include but not limited to higher wages and benefits.

Strategy #4:

IDVR partners annually during the month of October with IDOL, Idaho Council on Developmental Disabilities, Department of Aging, Idaho School for the Deaf and Blind, Idaho Commission for the Blind and Visually Impaired, SILC, local school districts, and the Idaho ADA Task Force to increase employer awareness regarding the hiring of individuals with disabilities. During the month of October one day is set aside to place transitioning students with disabilities with an employer so they may job shadow in a career of their choice. This assists in raising employer awareness and increases the students understanding of the workplace.

Strategy# 5:

IDVR partners with the U.S. Department of Apprenticeship, IDOL, Workforce Development, and all Idaho Universities and colleges. By participating on this committee IDVR is able to ensure the educational and employment needs of individuals with disabilities are being recognized and met. It further enhances their ability to secure jobs utilizing the apprenticeship program.

Attachment 4.11(d)(2)(A), (B) and (C):

EXTENT TO WHICH THESE STRATEGIES WILL BE USED TO ADDRESS THE GOALS IDENTIFIED IN THE NEEDS ASSESSMENT, SUPPORT THE INNOVATION AND EXPANSION ACTIVITIES AND OVERCOME IDENTIFIED BARRIERS

Assistive technology services and devices: This particular strategy will be utilized to support all four goals identified in attachment 4.11(c)(1). In order to overcome identified barriers relating to equitable access to and participation of individuals with disabilities, IDVR has established a collaborative relationship with the Idaho Assistive Technology Project, which assures that the latest rehabilitation technology is available to clientele throughout the state. In addition, by supporting the Reutilization Demonstration Grant, individuals with the most significant disabilities will have better access to durable medical equipment that will enable them to actively participate in independent living, supported employment and other vocational activities.

Expansion and improvement of services to individuals with disabilities: IDVR will employ every resource outlined in attachment 4.11(d)(1)(A) strategy #2 to ensure that the nine areas of focus outlined are achieved in order to successfully complete the four goals identified in attachment 4.11(c)(1).

Outreach to minority and other underserved/unserved populations: The 2010 IDVR Comprehensive Needs Assessment reinforced the need for greater focus upon the service needs of these populations. By collaborating with community partners, IDVR will develop enhanced service delivery strategies that will more effectively reach the targeted, underserved, minority populations identified in the first two goals established in 4.11(c)(1). Additionally, transitioning youth are a primary concern both on a state and national level. Two out of three students leave high school unprepared for college or the modern workplace. Minority and low income students are particularly at risk. This includes individuals with disabilities. By partnering with other agencies through the Inter-Agency Secondary Transition Working Group and other interested organizations, the resources and expertise provided to this population are greatly increased. This will address the drop out rate and enable students to become better prepared for employment.

Community rehabilitation programs (CRP): The three strategies outlined in 4.11(d)(1)(C) will ensure that the quality of the services provided by our CRP vendors across the state remains at a level required to deliver efficient and effective outcomes. All four populations identified in the goals will benefit from the high standard of service delivery provided by competent vendors.

Improvement of the federal evaluation standards and performance indicators: Through the achievement of the annual projected rehabilitation performance outcome, the agency will ensure that the statistical numbers associated with each State Plan objective related to the four stated goals are met.

Strategies for assisting other components of the statewide workforce investment system in assisting individuals with disabilities: Adequate funding to meet the demand

for vocational services is always an issue with the agency and will continue to be of concern as costs for services increase. The use of comparable benefits will help to supplant agency funds that can then be used elsewhere. The 2010 Statewide Needs Assessment indicated an overall theme regarding the need for additional funds for support services for individuals. The collaboration with other agencies and continued focus on WIA partners will assist in the on-going search and acquisition of comparable benefits.

**Attachment 4.11(e)(2):
EVALUATION AND REPORTS OF PROGRESS FOR FFY 2009**

The Idaho Division of Vocational Rehabilitation maintains an effective working relationship with the State Rehabilitation Council (SRC) to ensure that the rehabilitation needs of individuals with disabilities are effectively communicated. The Division meets with the SRC on a quarterly basis where Division staff share the State goals and priorities and input is solicited from the Council. The Division regularly consults with the Council regarding the development, implementation and revision of State policies and procedures pertaining to the provision of Vocational Rehabilitation services. The SRC conducts annual statewide client satisfaction surveys. IDVR integrates that information, along with the survey information collected by IDVR and develops and implements any appropriate training related to deficiencies identified in the survey results. The survey results, along with the training that is adapted from those results, is designed to have a positive impact on the Federal Standards and Indicators that govern the outcome of the VR program.

The SRC and the Division maintain communications in order to better manage the relationship between the two organizations. One component of the communication plan is for the Division's Administrator and the SRC Chairman to communicate by phone at a minimum of once every two weeks to discuss on-going items of concern. This has worked relatively well in maintaining communication. Every new policy developed by the Division is submitted to the SRC for discussion. Discussions typically occur prior to the final draft of the policy. On occasion, the SRC will vote on a policy change by the Division after discussion is concluded. If timeliness is a concern, the SRC receives information on important items by e-mail. Some of the SRC business is also conducted through the use of e-mail.

SRC members, especially the Chairman, are invited to IDVR quarterly management meetings. In these meetings, the opportunity is afforded for interaction with Division Management Staff. The SRC is invited and encouraged to attend and participate in national and regional meetings as well. SRC members continue to attend national CSAVR meetings.

ACTIONS TAKEN IN SUPPORT OF IDVR FFY 2009 GOALS AND PRIORITIES

Goal #1- Service Delivery: IDVR will provide the services required to ensure that individuals with significant disabilities secure employment and achieve economic self-sufficiency.

Objectives:

1.1 Comprehensive vocational guidance and counseling will be consistently provided during the development of the IPE. Case audits at closure and regional reviews will be used to monitor compliance with this goal. A minimum of 300 cases will be monitored for compliance during FFY 2008.

Achieved during FFY 2008: Over 300 cases were monitored for compliance via case audits at closure and Regional Administrative Reviews. Based upon data compilation, over 90% of the cases reflected comprehensive vocational guidance and counseling.

Achieved during FFY 2009: In 2009 the quality assurance format was revised to include the review of 18 cases monthly across all regions. During 2009 the case closure checklist was revised and implemented in all case closures.

1.2 IDVR will collaborate with the WIPA grant awardees housed under the auspices of the Idaho CAP program in order to identify individuals receiving SSA who could potentially benefit from the provision of PASS plans, identification of work incentives and assistance in negotiating the SSA system. This objective will be measured by the number of participants referred to the WIPA grant program. Since this is a new grant program, the total number of participants referred at the completion of FFY 2008 will be used as a baseline from which to measure future increase or decrease of referrals.

Achieved in FFY 2008: A total of 93 SSA clients were referred to the WIPA grant program for identification of work incentives and navigation of the SSA system.

Not Achieved in FFY2009: A total of 43 SSA clients were referred to the WIPPA grant program for identification of work incentives.

1.3 IDVR counselors will encourage and support PASS plan development for individuals receiving SSA whenever appropriate, with a goal of 5 PASS plans written for FFY 2008.

Achieved during FFY 2008: A total of 13 Pass plans were written in FFY 2008, with at least 5 approved, and the remaining pending a decision.

Achieved during FFY2009: A total of 59 referrals were made to the PASS program, 7 Pass plans written, and 16 PASS plans in development.

Goal # 2- Transitioning Students: IDVR will partner with the Idaho Department of Education, Special Education, to create regional working groups that include the VR counselor, special education teachers and other pertinent participants to further the

cooperation and collaboration of agencies providing services to transition age youths.

Objectives:

2.1 IDVR Field Services Chief, along with representatives from Special Education and other community agencies, will establish the framework for regional working groups throughout Idaho. These working groups will standardize the delivery of services within each region and encourage the sharing of resources. By the end of FFY 2008, at least one region of the state will be identified as having agency and community participants committed and available to begin the formation of a functional working group. A minimum of one regional group will be established and functioning by the end of FFY 2009.

Achieved in FFY2008: Twin Falls Regional Working Group was established in FFY 2008 and has been meeting on a regular basis.

Achieved in FFY 2009: The Magic Valley Transition Team (MVTT) in Twin Falls continues to meet on a regular basis. This group is composed of community members, parents, area high school teachers, administrators, state agency staff and others interested in the success of transitioning students. This group created a program know as the Students Transitioning in Responsibility, Independence and Vocational Education (STRIVE). The STRIVE program strategy is to provide direct services to secondary and adult students. The students are chosen by area school districts and are provided with services such as employment and career information, community participation, independent living skills and identification of adult services. These areas align with the activities required to be included in a student's IEP. Currently, there are 7 students participating in the STRIVE program.

2.2 Based upon the implementation of the working group prototype IDVR will exceed the documented School Work Transition rehabilitations in FFY 2008 compared to year end FFY 2007 by 1%.

Achieved in FFY 2008: The number of School Work Transition rehabilitations documented in 2007 totaled 350. The number of School Work Transition rehabilitations in 2008 totaled 370, resulting in an increase of approximately 6%.

Not Achieved in FFY 2009: The number of School Work Transition rehabilitations documented in 2009 totaled 292, resulting in a decrease of approximately 21%. During FFY 2009, Idaho experienced a significant downturn in its economy, which resulted in a substantial reduction of school age employment outcomes.

Goal #3-Staff Development: IDVR will continue to develop and employ qualified staff as defined by the guidelines of the Comprehensive System of Personnel Development (CSPD).

Objectives:

3.1 Identify and support counselors employed by IDVR in their efforts to meet the CSPD requirements within the 5-year timeframe in order to maximize the number of counselors with master's level credentials.

Achieved: IDVR identified those counselors who need to meet the CSPD requirements within 5 years of their hire date. In addition, IDVR provided financial support as well as assistance with investigating additional coursework and programs that offer stipends.

3.2 Provide staff pertinent training opportunities that enhance their rehabilitation knowledge and professional development.

Achieved: Training opportunities have been identified by conducting needs assessments. In addition, training has been provided to staff which has enhanced their rehabilitation knowledge and professional development. Trainings include caseload management, management and leadership, ethics, vocational assistant training, work incentives, and motivational interviewing.

3.3 Training will be provided to staff, based on the results of a regularly scheduled internal regional casework review process, to ensure that competencies are maintained.

Achieved in FFY2009: IDVR redesigned the internal regional casework review process, which includes identifying staff training needs and addressing those needs in order to ensure that competencies are maintained.

Goal #4 Supported Employment (SE): IDVR will provide high quality Supported Employment (SE) services statewide to a greater number of eligible individuals.

Objectives:

4.1 IDVR will work with interested state and community partners to craft a strategy to increase the percentage of individuals in long-term community supported employment

versus sheltered employment (work services). This goal will be measured by an increase of 1% in community employment placements.

Not Achieved in FFY 2008: This goal was not achieved due to a number of external factors. State Medicaid changed specific parameters within the waiver program which directly impacted client funding for programs such as EES. Additionally, there has been a dramatic increase in the number of individuals requesting work services to maintain skills or re-enter the work force after losing community jobs due to the economic downturn.

Not achieved in FFY 2009: Due to a state appropriations cut, during 2009, adequate long term support funding was unavailable to provide CSE opportunities for additional eligible clients necessary to exceed the previous year's achievement.

4.2 IDVR will document the need for state funding for long-term support services. This documentation will be used to support the request of an enhancement in state funding in the FFY 2009.

Achieved: Upon analysis of the EES program and potential customers, IDVR has determined that a minimum of \$800,000 is necessary to address the extent of individual budgetary needs.

Attachment 4.11(e)(2)(D):

Status of Evaluation Standards and Performance Indicators

Current status (FFY 2009) of IDVR Standards and Performance Indicators:

Evaluation Standard 1: Employment Outcomes

Performance Indicator 1.1:

The Number of Individuals Achieving Employment Outcomes During the Current Performance Period Compared to the Number from the Previous Performance Period.

FFY 2007: 2120 Rehabilitations

FFY 2008: 2083 Rehabilitations - Indicator Failed

FFY 2009: 1857 Rehabilitations - Indicator Failed

Performance Indicator 1.2:

The Percentage of Individuals Receiving Services Under an Individualized Plan for Employment Who Achieve Employment Outcomes.

Federal Minimum: 55.8%

FFY 2008: 65.9% - Indicator Passed

FFY 2009: 64.8%- Indicator Passed

Performance Indicator 1.3:

Competitive Employment Outcomes as a Percentage of all Employment Outcomes.

Federal Minimum: 72.6%

FFY 2008: 97.8% - Indicator Passed

FFY 2009: 97.6% - Indicator Passed

Performance Indicator 1.4:

Competitive Employment Outcomes for Individuals with Significant Disabilities as a Percentage of all Individuals with Competitive Employment Outcomes.

Federal Minimum: 62.4%

FFY 2008: 98.9% - Indicator Passed

FFY 2009: 99.3% - Indicator Passed

Performance Indicator 1.5:

The Ratio of the Average VR Hourly Wage to the Average State Hourly Wage.

Federal Minimum: .52 ratio

FFY 2008: .60 - Indicator Passed

FFY 2009: .61 – Indicator Passed

Performance Indicator 1.6:

The Percentage of Individuals Achieving Competitive Employment Outcomes Who Report Their Own Income as the Primary Source of Support at Application Compared to at Closure.

Federal Minimum: At least 53.0 (*math difference*)

FFY 2008: 68.5 - Indicator Passed

FFY 2009: 68.2 - Indicator Passed

Evaluation Standard 2: Equal Access to Services

Performance Indicator 2.1:

Access to Services for Minorities as Measured by the Ratio of the Minority Service Rate to the Non-Minority Service Rate.

Federal Minimum: .80 ratio

FFY 2008: .857 - Indicator Passed

FFY 2009: .926 – Indicator Passed

**Attachment 4.11(e)(2)(E):
Utilization of the Funds Reserved for the Innovation and Expansion Activities in
FFY 2009**

IDVR provided funding support for the State Rehabilitation Council expenditures including travel, lodging, advertising for town meetings, supplies, meeting room rentals, interpreters when necessary, facilitation services, and costs related to consumer satisfaction/outreach surveys.

Cost: \$20,680

Funding support for the State Independent Living Council (SILC) is also allocated out of Innovation and Expansion funding. IDVR has allocated 71% of independent living funding provided through Title I to the SILC. The remaining 29% is distributed directly to the Disability Action Center (a center for independent living). The SILC is responsible for disseminating funding to the other centers for independent living statewide.

Cost:

SILC: \$138,357 (total federal and state match)

DAC: \$52,911 (total federal and state match)

Attachment 6.3

QUALITY, SCOPE, AND EXTENT OF SUPPORTED EMPLOYMENT SERVICES

The Idaho Division of Vocational Rehabilitation (IDVR) provides the full scope of Community Supported Employment Services (CSE) to those Vocational Rehabilitation (VR) eligible individuals with the most significant disabilities, who require extended services to maintain employment, and have at least a reasonable expectation that a source of extended services (long-term support) will be available at the time of transition. CSE includes, if necessary, situational assessments through Trial Work Experiences (TWE), or other diagnostic strategies, to assess the individual's interests and abilities.

Once an appropriate Community Supported Employment position is identified for an individual, IDVR provides supported employment job coaching services for a period of up to 18 months. The services can be extended beyond 18 months, when appropriate, upon agreement of the consumer and the counselor.

Community Supported Employment Services provided to individuals are coordinated through an Individualized Plan for Employment (IPE) that includes a description of the services needed, the identification of the state, federal, or private programs that will provide the continuing support; and the basis for concluding that continuing support is available.

Community Supported Employment Services include the following:

1. If necessary, a supplemental evaluation to the evaluation of the rehabilitation potential provided under 34 CFR, Part 361.
2. Job development and placement into competitive, community integrated employment. Traditional time-limited services needed to support the training in employment.
3. Any other service that would be identified as requisite to the targeted supported employment outcome.

Each individual's IPE describes the timing of the transition into extended services, which is to be provided by the long-term support provider following the termination of time-limited services by IDVR.

All Community Supported Employment Services are provided by qualified Community Rehabilitation Programs (CRPs) who have demonstrated the capacity to provide the

service and are accredited by either the Commission on Accreditation of Rehabilitation Facilities (CARF) or Rehabilitation Services Accreditation Systems (RSAS) accredited. Community Supported Employment Services are purchased through Title VI-B and Title 110 funds.

Current Idaho Division of Vocational Rehabilitation (IDVR) policy and the Federal regulations require a third party commitment in writing, to designate the long-term support provider. Since 07/01/2004, the Extended Employment Services (EES) Program under the IDVR is the main provider of long-term support, although those individuals who qualify for the DD waiver can use Medicaid funds. A CSE participant may only be transitioned to long-term support based on an assessment of rehabilitation goal achievement and job stability. Periodic monitoring occurs to ensure that each individual receiving Community Supported Employment Services is making satisfactory progress.

In FFY 2010 IDVR resubmitted a request for additional funds from the state to provide long term maintenance for the SE program. Due to the economic downturn, not only was this request denied but current funds were cut by 10.4%.

The intent is to re-submit a request in FFY2011 for funding in 2012.
